

# Weaving the Web of Life Worksheet

Name: \_\_\_\_\_

In the space provided, draw a web of life that includes all the ecosystem elements that exist in your favourite natural area. Give it a title to let others know where this web of life might be found. Answer the following questions either as part of your web of life or on a separate sheet:

1. Identify the source of energy for the entire web.
2. Identify any **decomposers, producers, consumers, herbivores, carnivores** and **omnivores** you have included in your web of life.
3. What **predators** and **prey** are in this web?
4. What do you think is the advantage of an animal relying on more than one food source?
5. Do you think other organisms would be affected if a major food source was removed from the web? How?

Title: \_\_\_\_\_
